

Carmalite Weddle Elementary School Salem, Oregon

DESCRIPTION The Salem-Keizer School District purchased a vacant nearly flat 37.4-acre site that accommodates both a new middle school and a new elementary school. These two schools will lessen the overcrowding in the nearby schools and will also accommodate the increased number of students that have moved into the rapidly growing Keizer area.

The elementary school has an initial capacity of 450 students. This school is a single story structure of nearly 50,000 square feet plus a covered play area featuring a Kitchen, gymnasium, 20 functioning classrooms, separate Music room and a full size Multipurpose Area with built-in stage. All work was completed in September, 2001.

SERVICES Project/Construction Management

BUDGET \$8,602,754

FINAL COST \$8,168,615
